Lithography: A Revolution in Printing

Developed in 1796 by Alois Senefelder, lithography revolutionized the art world. It allowed artists to produce high-quality prints in large numbers, democratizing the accessibility of fine art.

Unlike traditional printmaking methods like engraving and etching, lithography utilized a flat stone surface (limestone) as its printing plate. The image was created by drawing directly onto the stone with a greasy crayon or ink, which repelled water but attracted ink.

The stone was then moistened, and ink was applied. The water repelled the ink from the non-image areas, while the greasy crayon areas accepted the ink, resulting in a printed image.

The Birth of Artistic Lithography

Initially used for commercial purposes, lithography's potential for artistic expression was soon recognized. In the 1820s, artists began experimenting with the technique, creating stunning prints that showcased its unique qualities.

Artists like Francisco Goya, Édouard Manet, and Henri de Toulouse-Lautrec embraced lithography as a medium for their groundbreaking artworks. They explored its capabilities for subtle tonal variations, rich textures, and expressive brushstrokes.

The Evolution of Artistic Lithography

Over the years, lithography evolved into a sophisticated art form, with artists pushing its boundaries and exploring new possibilities.

In the 19th century, color lithography became popular, allowing for vibrant and complex prints. Artists also experimented with different types of paper and inks, creating innovative effects.

In the 20th century, lithography continued to thrive, with artists like Pablo Picasso, Marc Chagall, and Andy Warhol incorporating it into their modern masterpieces.

The Centenary Exhibition

This comprehensive exhibition celebrates the centenary of artistic lithography by showcasing over 200 works from the past 100 years.

The exhibition features iconic prints from renowned masters, including:

- Francisco Goya's "Caprichos" series
- Édouard Manet's "Olympia"
- Henri de Toulouse-Lautrec's "Moulin Rouge" posters
- Pablo Picasso's "Guernica" series

- Marc Chagall's "The Circus"
- Andy Warhol's "Marilyn Monroe"

These prints offer a glimpse into the evolution of lithography, showcasing its technical innovations, artistic expression, and cultural significance.

A Valuable Reference

Accompanying the exhibition is a fully illustrated catalog that serves as an invaluable reference for art enthusiasts, historians, and collectors.

The catalog includes:

- High-quality reproductions of all exhibited prints
- In-depth analysis of the works and their historical context
