Customizing Notifications

Notifications in iOS 15 have received a major overhaul, giving you more control over how and when you receive alerts. Say goodbye to the constant bombardment of notifications and hello to a more personalized and distraction-free experience.

Introducing Notification Summary

Tired of being overwhelmed by a never-ending stream of notifications? Notification Summary is your savior. This feature intelligently groups similar notifications together and delivers them to you at a time of your choosing. You can customize your notification summaries to ensure that the most important alerts are delivered promptly, while less urgent ones are batched together for a less intrusive experience.

Scheduled Delivery for Notifications

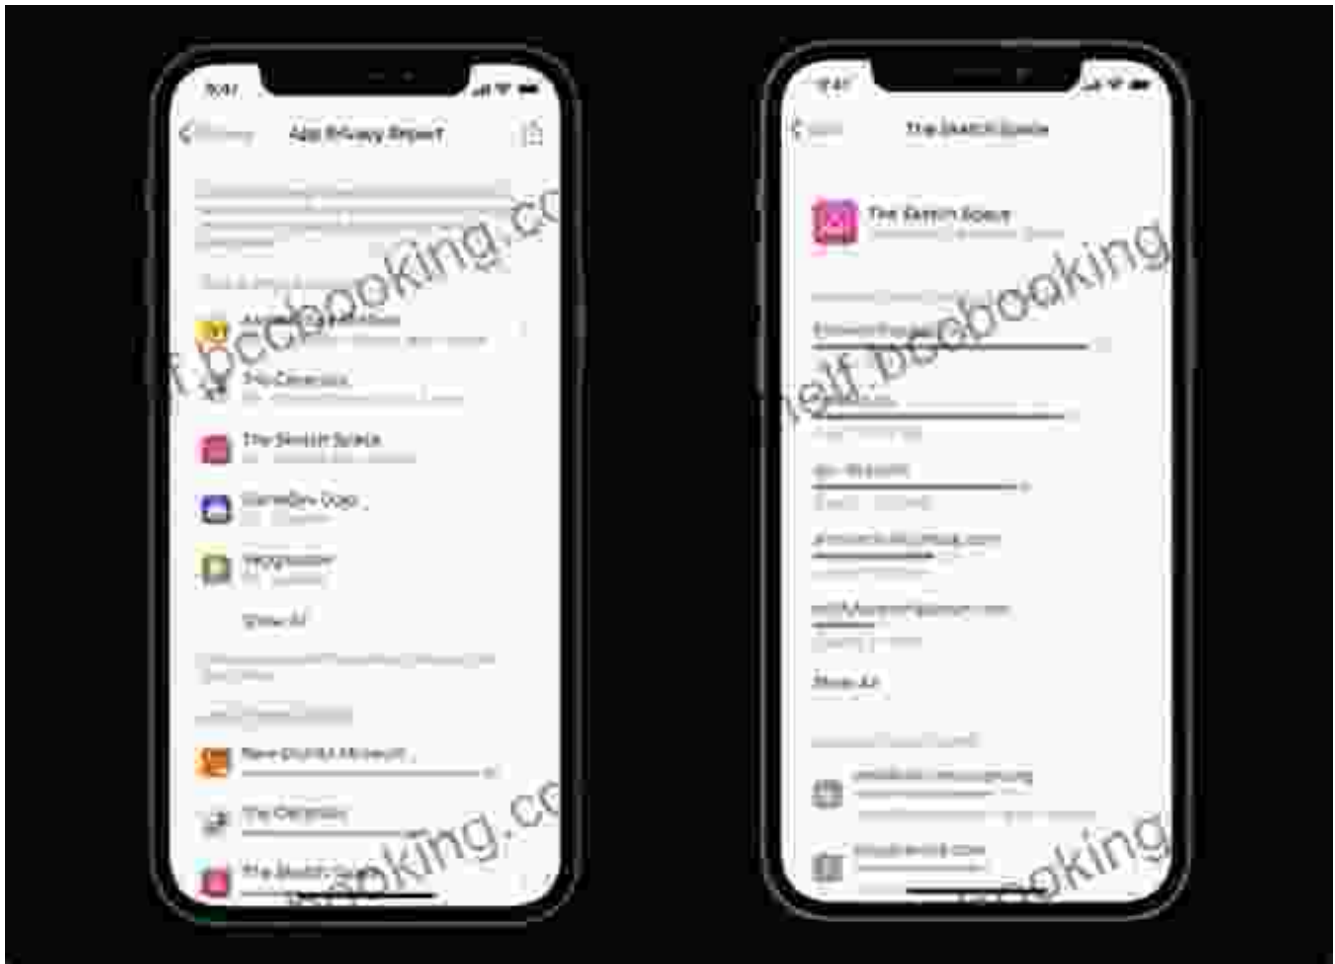

Got an important notification that you don't want to miss but can't deal with right now? Simply schedule it to be delivered later. With the new scheduled delivery feature, you can set notifications to appear at a specific time, ensuring that they don't get buried amidst other alerts.

Silence Unknown Callers

Spam calls and unwanted solicitations can be a major annoyance. iOS 15 introduces a "Silence Unknown Callers" feature that automatically sends calls from unknown numbers to voicemail. This way, you can rest assured that only calls from people you know and trust will ring your phone.

Enhanced Privacy Controls

Apple has always placed a strong emphasis on user privacy, and iOS 15 takes this commitment to the next level. With new privacy features and enhancements, you can gain greater control over your personal data and protect your digital footprint.

Mail Privacy Protection

Email tracking is a common practice used by companies to collect information about your browsing habits and preferences. With Mail Privacy Protection, iOS 15 puts an end to this intrusive practice by hiding your IP address and preventing senders from seeing whether you opened their emails.

App Privacy Report

Curious to know which apps are accessing your data and how they're using it? The App Privacy Report provides a comprehensive overview of app activity, including details on sensors, data types accessed, and network

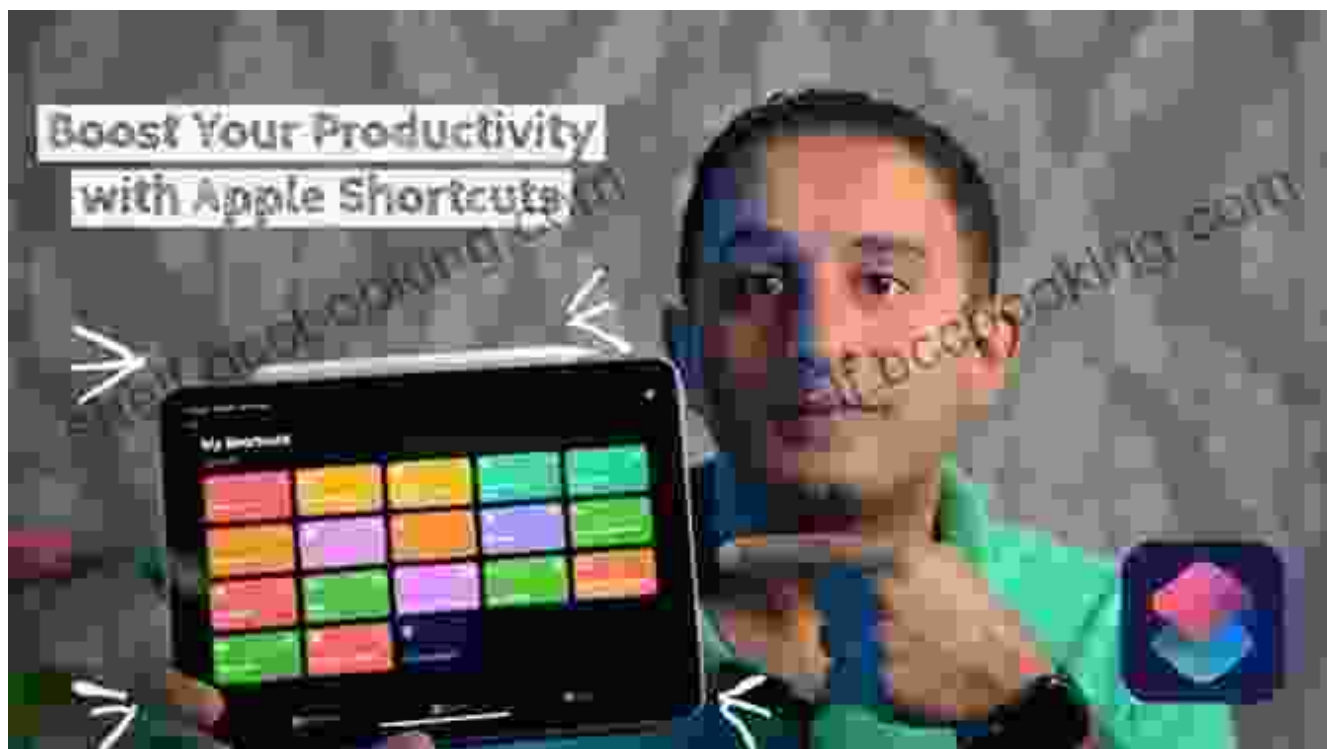

connections. This report empowers you to make informed decisions about the apps you use and the data you share.

Hide My Email

Need to share your email address with untrustworthy sources but don't want to risk exposing your personal inbox to spam or phishing attacks? Hide My Email allows you to create unique, random email addresses that forward to your real inbox. This way, you can keep your primary email address private and protected.

Productivity-Boosting Shortcuts

Shortcuts in iOS 15 take automation to the next level, enabling you to create custom workflows that streamline your tasks and save you precious time. From automating repetitive tasks to creating personalized shortcuts, the possibilities are endless.

Customizable Shortcuts

iOS 15 introduces a revamped Shortcuts app that makes creating and managing shortcuts easier than ever before. With a user-friendly interface and a library of pre-built actions, you can quickly assemble custom shortcuts tailored to your specific needs.

App Intents

Shortcuts now supports a wide range of app intents, allowing you to interact with your favorite apps in new and innovative ways. For example, you can create a shortcut to send a WhatsApp message, start a Spotify playlist, or reserve a table at your favorite restaurant.

Automation Suggestions

iOS 15 intelligently suggests automation shortcuts based on your usage patterns and preferences. These suggested shortcuts help you identify areas where automation can streamline your workflow and save you time.

Entertainment-Enhancing Widgets

Widgets in iOS 15 have undergone a major redesign, making them more customizable, informative, and interactive than ever before. From dynamic wallpapers to interactive music controls, from news feeds to fitness trackers, widgets bring essential information and functionality to your home screen.

Dynamic Wallpapers

Dynamic wallpapers add a touch of interactivity to your home screen. These animated wallpapers change throughout the day based on the time of day, weather conditions, or any other variable you choose.

Interactive Music Controls

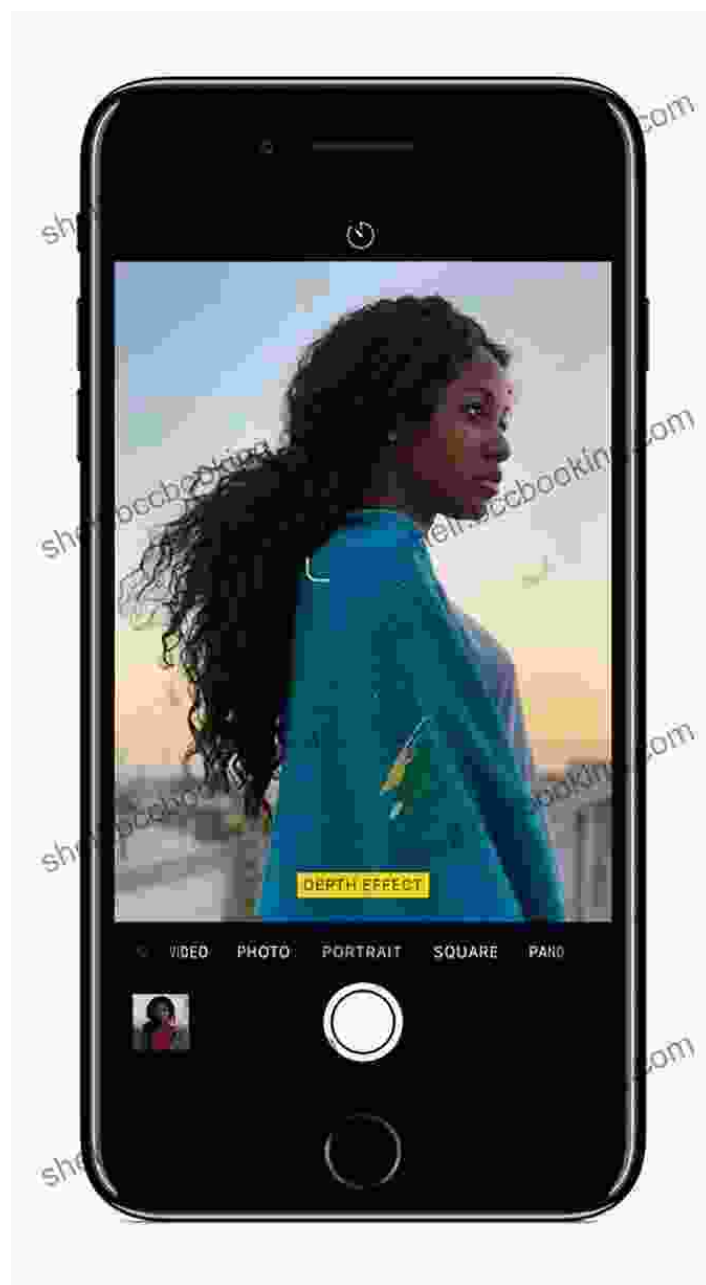

With interactive music controls, you can control your music playback directly from your home screen. Swipe up or down to adjust the volume, tap to play or pause, and even scrub through the track without having to open the Music app.

Customizable Widgets

iOS 15 offers a wide variety of customizable widgets to suit your taste and preferences. You can resize, stack, and arrange widgets on your home screen to create a truly personalized experience.

Camera and Photo Enhancements

iOS 15 brings a suite of camera and photo enhancements that empower you to capture stunning images and unleash your creativity. From powerful editing tools to cinematic video recording, from Live Text to ProRes video capture, iOS 15 transforms your iPhone or iPad into a versatile photography and videography powerhouse.

Cinematic Video Recording

Cinematic video recording brings Hollywood-style depth of field effects to your videos. This feature automatically focuses on the subject of your video while blurring the background, creating a cinematic depth of field that elevates your videos to a whole new level.

Live Text

Live Text is a groundbreaking feature that allows you to interact with text in images. Simply point your camera at a document, menu, or any other text-based object, and iOS 15 will automatically recognize and extract the text. You can then copy, paste, search, or translate the extracted text, making it easier than ever to capture and share information.

ProRes Video Capture

For professional videographers and content creators, iOS 15 introduces ProRes video capture. This high-quality video format offers greater color accuracy, dynamic range, and editing flexibility, making it ideal for capturing and editing professional-grade videos on your iPhone.
